PROFILE

Full-Stack & Cloud Engineer with over 3 years of experience designing and maintaining backend architectures, real-time services, and cloud infrastructure migrations (AWS to Alibaba Cloud OSS). Specialized in data flow optimization, IoT/hardware integration via WebSockets, and automating critical business processes.

EXPERIENCE

Full-stack developer November 2025 – Present

OPPO *Mexico City*

- Automated a dynamic commission calculation system featuring 16 configurable KPI templates, processing approximately MXN $8 million in monthly payouts nationwide.
- Led the complete migration of digital assets from AWS S3 to Alibaba Cloud OSS, rearchitecting the application to fetch image assets through an internal backend flow instead of external requests.
- Reduced egress traffic and external server dependencies, optimizing report generation speed and accelerating system validation workflows.
- Developed and maintained REST APIs and backend services using PHP, Python, Node.js, Express.js, MySQL, and Redis.

Full-stack developer March 2025 – November 2025

Posibilidades *On Remote*

- Led a team of 4 developers across the entire SDLC: planning, code reviews, and delivery.
- Built the real-time event infrastructure coordinating requests between ~300 mobile apps and local controllers. Developed WebSocket services in Python to orchestrate communication between the PHP central server and device firmware, ensuring low latency and high reliability.
- Modernized legacy integrations, improving system stability and reliability.

Software Engineer June 2023 – March 2025

Freelance *On Remote*

- Government of Aguascalientes – Web Developer: Designed and developed the official website and platform for Prepa Abierta de Aguascalientes, utilizing Vue.js and institutional tools under Agile methodologies (Scrum/Trello) to ensure accessibility, high performance, and responsive design.
- Depfly (Startup) – Mobile Developer: Developed and optimized mobile applications for production environments, implementing efficient user flows, REST API integrations, and robust mobile architecture best practices.

EDUCATION

Bachelor's in Computer Systems Engineering 2020 – 2024

Universidad Autónoma de Aguascalientes *Aguascalientes*

SKILLS

Languages: PHP, Python, Java, JavaScript, Flutter, Vue.js, Nuxt.js, React, React Native.

Backend & APIs: REST API Design, Laravel, WebSockets, Node.js, Express.js.

Architecture: Clean Architecture, MVC, MVVM, Distributed Systems.

Databases: MySQL, Microsoft SQL Server, Redis, Hadoop, Elasticsearch, Alibaba Cloud OSS.

DevOps & Tools: Git, Docker, CI/CD, Linux, Alibaba Cloud.

Practices: Code Review, Refactoring, Software Testing, SDLC

Methodologies: Agile (Scrum), Trello, Asana

LANGUAGES

Spanish *Native* **English** *Professional Working Proficiency*
