- Tools & DevOps
 - Git, Docker, CI/CD (Continuous Deployment)
 - Engineering Practices
 - Code Refactoring, Software Testing, Software Development Lifecycle (SDLC)
 - Methodologies
 - Agile (Scrum), Trello, Asana

Experience

Full-Stack Developer

November 2025 to Current

OPPO - Ciudad de México, México

- Designed and developed backend functionalities in PHP (Laravel and Zend) for high-concurrency systems supporting 100,000+ users.
- Built scalable REST APIs and large-scale reporting systems, optimizing queries and processes to improve performance.
- Performed code analysis, refactoring and code reviews, reducing technical debt and improving maintainability while collaborating with international teams.

Full-Stack Developer

April 2025 to November 2025

Posibilidades - On remote

- Led the full software development lifecycle, achieving 100% on-time deliveries and reducing defects by 20%.
- Modernized legacy codebases and Google services integrations, increasing system stability by 30%.
- Reduced technical debt in an application under development since 2023, improving maintainability and overall performance.
- Developed Flutter applications using MVC, MVVM, and Clean Architecture, reducing development time for new features by 40%.

Software Developer / Tech Assistant

January 2024 to November 2025

TecnoDom - Aguascalientes, México

- Led the development of automation solutions in smart home (domotics) systems, optimizing key processes.

Flutter Mobile Developer

July 2024 to February 2025

Depfly - On remote

- Contributed to the development of a large-scale mobile application using Clean Architecture and MVC.
- Actively participated in Scrum ceremonies, helping define both technical and product objectives.

Front-End Developer

February 2024 to August 2024

IEA - Instituto de Educación de Aguascalientes - Aguascalientes, México

- Developed the "Prepa Abierta de Aguascalientes" web portal using Vue.js.
- Integrated and utilized Government of Aguascalientes (GEA) resources and services to support the platform.
- Managed the project using Scrum methodologies and agile project management tools.

Software Developer (Full-Stack & Mobile)

January 2023 to January 2025

Freelance / Projects - On remote

- Developed and maintained applications using Flutter, Vue.js, and Node.js.
- Built scalable solutions and reduced development time for new features by 40%.
- Collaborated with teams using Scrum methodologies across multiple projects.

Education

Ing. : **Sistemas Computacionales**, December 2024

Universidad Autónoma De Aguascalientes
